- Customer first
- Respect for people
- Team work

PROFILE

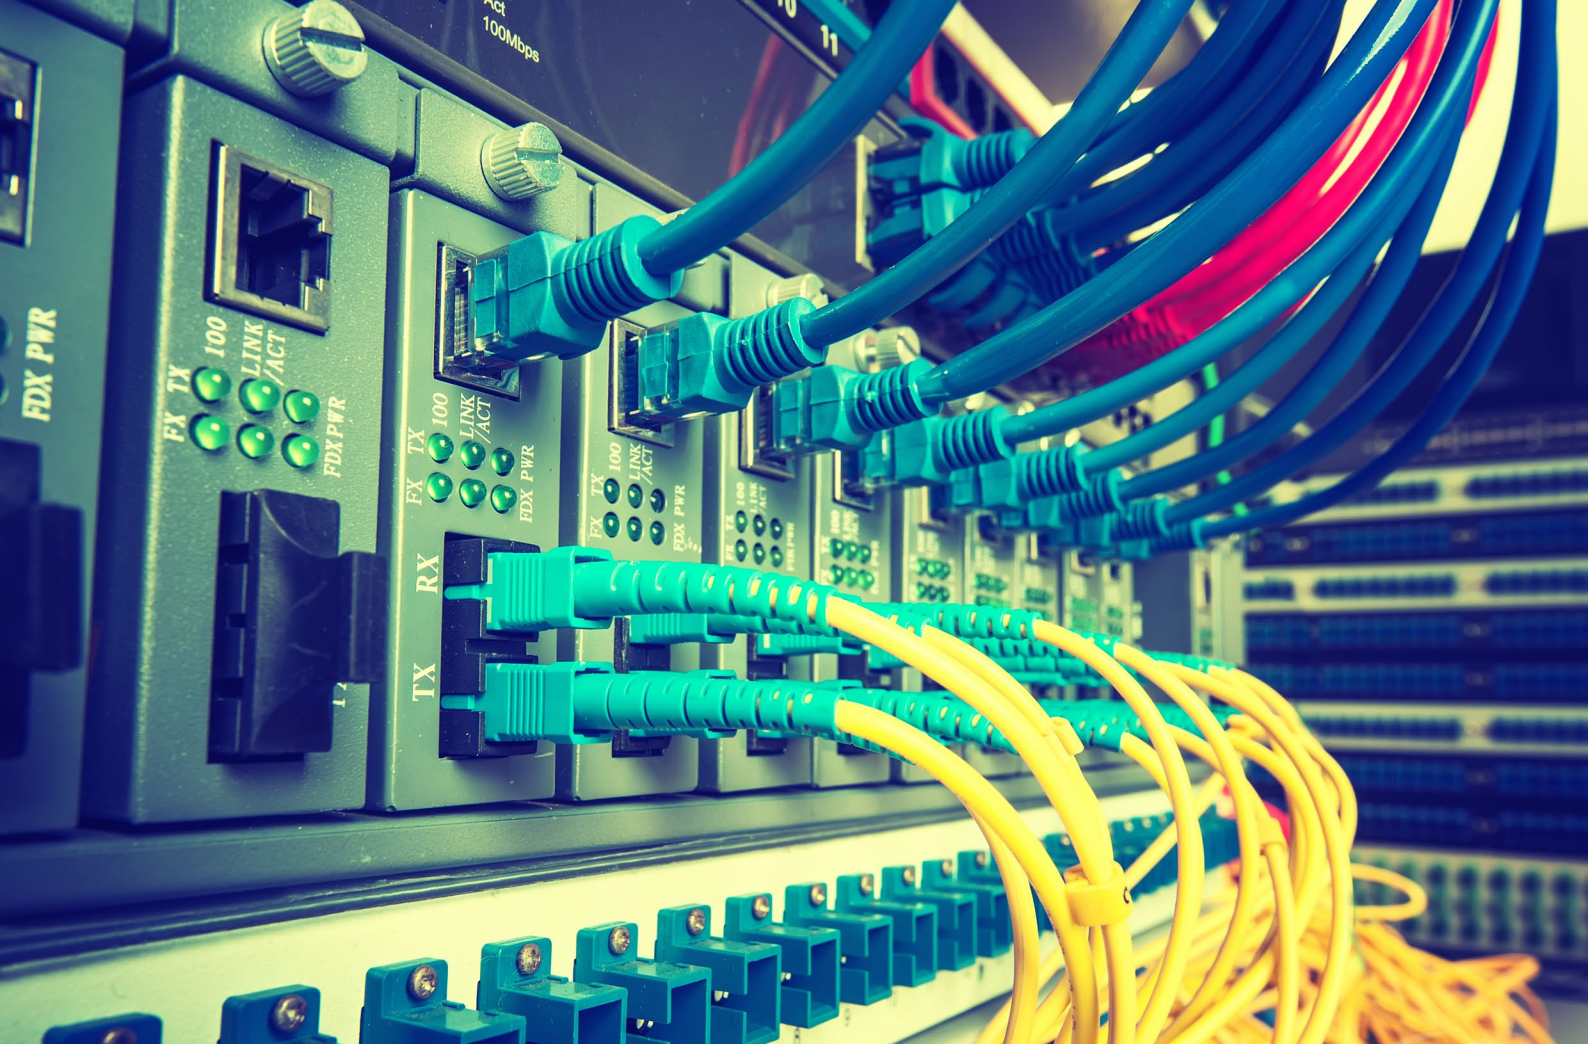

Over the years Riroy Company Limited has been evolving as one of Kenya's most dynamic and specialised infrastructure companies providing a wide range of end-to-end solutions majorly in telecommunication and electrical engineering to private enterprises as well as government agencies.

At Riroy, our portfolio is built on our experience in providing solutions and delivering service to the end-user. We offer a wide range of IT installation and support services based on a working knowledge acquired over the years.

It is our aim to assist our customers, not just today but in the future by bringing them the latest technology that will help them stay ahead of the competition.

With a team of highly trained and experienced data, telecoms and electrical engineers we provide advice, installation, maintenance and Technical Support for a wide range of voice and fixed data products and services.

Whether you are considering implementing a new system, upgrading, or simply require support, we are able to offer a comprehensive response to your needs.

WHAT WE DO

Telecommunication Engineering Services

Communication technology is evolving at lightning speed. At Riroy, we are not only keeping pace with that evolution, we're driving it. Our end-to-end services help customers with a range of infrastructure considerations, from architecture and design to site readiness and product fulfilment to intergration, maintenance, and management.

By combining cutting-edge technology, innovative solutions, skilled professionals, and an unfailing commitment to safety, we ensure that our customers are able to meet their customers' communication needs with the highest levels of quality and reliability. We manage end to end processes, delivering fully intergrated communication solutions through our affordable turnkey packages. Our advantage is that we take a look at your needs and infrastructure as a whole to design a network that suits you best.

We provide total inbuilt wireless systems including equipment delivery, RF design, construction and optimization to infrastructure intergrators working with the widest range of equipment for best solutions.

We offer an all inclusive one stop solution ranging from data network cabling including fiber optics and wireless network solutions.

Our services include:

Fiber Installation, Repair, Support and Maintenance

We supply & install fiber infrastructure technologies offering both Backbone fiber, Fiber to the Home (FTTH), and Fiber To The Building (FTTB).

Structured cabling-WAN, LAN

No matter what kind of hardware your office needs, the correct setup is crucial to making sure your network and machines work flawlessly. We design and install a cabling system that can handle both current and future networking/hardware needs in the most efficient way possible. With Riroy, you'll have the ideal cabling setup, without an office or server room that's covered in cables.

Maintenance Services and End User Support

Maintenance is essential to ensure an IT system – whether a personal computer or a corporate server – remains secure and stable and operates effectively. Whether it is system updates, system patches, anti-virus implementation, or hardware and other equipment checks, we will be there.

Data Centre Services

Building an efficient data center or managing a server room anywhere else for that matter requires expertise and precision for efficient results.

Thanks to our rich experience in the field of data centers, we are happy to offer our services in designing, building and supporting data centers, server rooms and communication rooms to your satisfaction.

WiFi Configuration

Even in a complex single site, the network configuration basics required for a successful implementation can vary from one wireless network to another running on the same hardware as part of the overall wireless LAN environment. We will handle it all from design and survey, integrations to verification testing.

CCTV installation

Riroy offers a comprehensive range of CCTV surveillance systems designed to increase the level of security in a business. We offer professional CCTV installation services and maintenance support.

Telephony solutions

Whenever you consider purchasing a IP PBX or telephony system, its very likely that there are challenges you are looking out to solve.

A good IP PBX and VoIP Telephony Solutions must, firstly, be uniquely tailored to meet the unique requirements of customers from diverse industries, businesses and institutions.

Our friendly team of experts ensure proper methods are followed from Site Survey, Solution Design, Presentations, Installation & Commissioning of these systems in accordance with both local and international telecommunication standards. Moreover, we offer after-sales support services to ensure your peace of mind.

Electrical Engineering Services

Over the years Riroy Company Limited has been evolving as one of Kenya's most dynamic and specialised utility companies providing a wide range of end-to-end solutions majorly in electrical and powerline engineering to private enterprises as well as government agencies.

We have been at the core of Kenya's rural electrification programme working closely with the Rural Electrification and Renewable Energy Corporation (REREC) whose sole mandate is to provide high quality and affordable electricity connectivity in all rural areas. At REREC we have majorly been involved in:

- » Designing
- » Supplying
- » Installation
- » Testing, and
- » Commissioning of high voltage transmission lines including installation of transformers.

We have also been partners with Kenya Power whereby we have been entrusted with:

- » Installation and commissioning of pre- and post-paid energy metres.
- » Construction and maintenance of KV lines
- » Installation of distribution transformers.
- » Transportation and installation works
- » Wayleaves acquisition services.

We have over the years developed expertise to engineer solutions that help our clients meet their customers power needs. We customize our services to meet each of our clients technical requirement and budget.

Turnkey Solutions

⌚ Overhead line construction and maintenance

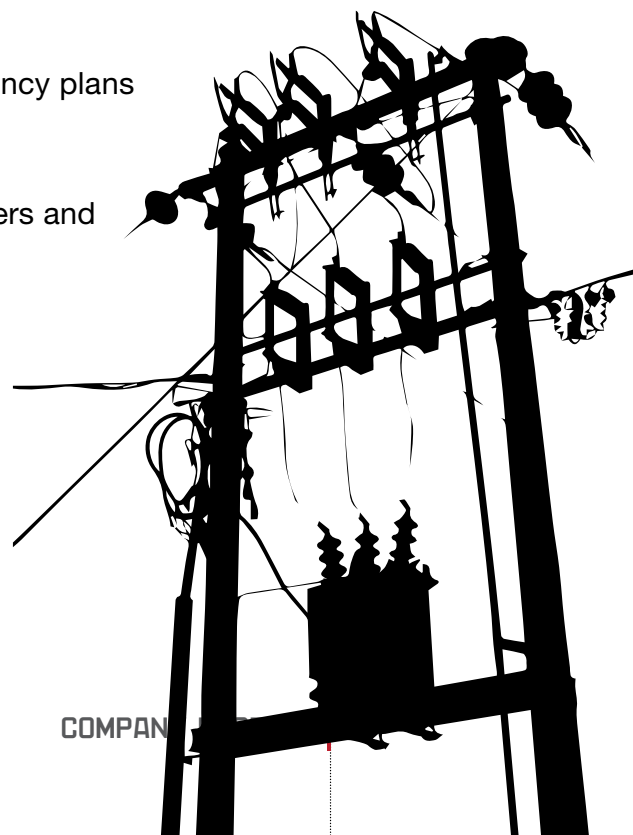

The Overhead Lines team at Riroy Company Limited possesses the skills and expertise to work on all aspects of LV & HV Overhead Power Line work up to and including 66KV. Work includes:

- ❧ Construction of new overhead lines
- ❧ Reactive fault repairs and network recovery
- ❧ Pole replacements
- ❧ Asset replacement and refurbishment
- ❧ Line design, surveys and asset data management
- ❧ Condition assessments, testing and feasibility studies
- ❧ Material procurement
- ❧ Underground lines – LV.

⌚ Project management

Riroy is a full turnkey provider offering complete project management services. All projects are initiated, controlled and executed to the highest quality and delivered on time and on budget.

- ❧ Dedicated project management team
- ❧ Robust pre-planning procedures
- ❧ Customised in-house software
- ❧ Detailed plans including resource plans and contingency plans
- ❧ Customised client reports
- ❧ Regular health and safety updates to all team members and subcontractors
- ❧ Liaise with external parties e.g. landowners access, public authorities (road closures etc).
- ❧ Budget control and management.

🕒 Surveying

Riroy Company Limited' bespoke Electronic Surveying Platform ensures greater efficiencies and 100% traceability when surveying the overall electrical network. This platform is fully customisable to meet client requirements.

- ❧ Information available at the touch of a button including photos, original client defect list, on-site risk assessments, network maps and diagrams.
- ❧ Offers clients a pro-active approach to maintaining network with access to detailed reports. For example, overall count of total number of poles, number of poles to be replaced, spans of conductor to be replaced etc.
- ❧ The system automatically collates store lists and order forms.

🔧 Maintenance Services

Riroy also deals in maintenance of air conditioning systems, electrical and mechanical, civil works for completed projects. We also undertake design and build projects in the above fields with modern and efficient operations across the country. The firm is strategically placed to serve clients' growing needs.

Our maintenance activities are in the following areas.

Electrical maintenance:

- ❧ Electrical lighting and power installation
- ❧ Consumer substations
- ❧ Transformer substations
- ❧ Underground and overhead electrical distribution services
- ❧ Fire detection and alarm systems

- » Emergency lighting
- » Lightning protection services
- » Telephone equipment and distribution installations
- » Telephone and data installations
- » Earthing systems and protection.

Air conditioning maintenance:

- » Air conditioning and mechanical ventilation installation
- » Mechanical ventilation services
- » Boiler plants and auxiliaries
- » Water pumps.

WHY CHOOSE US?

We have the technical expertise and reputation for efficient and timely project management and execution. We believe that our expertise in project implementation provides us with a significant competitive advantage.

Further, our technical expertise and execution capability enables us to position ourselves better to deal with construction or implementation risk.

Our health and safety policy

The safety and health of our employees is Riroy's most important business consideration. No employee will be required to do a job that they consider unsafe. The company complies with all the applicable Occupational Safety and Health requirements as stipulated in Kenya's Health and Safety laws.

OUR COMMITMENTS

- We will comply with applicable laws and regulations.
- We will constantly work to meet or exceed our customers' expectations
- We will scale up services when needed
- We will deliver support at short notice
- We will safeguard quality service.

OUR CLIENTS

At Riroy, there is a common understanding that reliability and quality are fundamental to any successful venture, and with this view in mind, our objectives are clearly focused on providing our customers the most trusted and reliable products and services.

Some of our clients include:

- Kenya Power
- Rural Electrification and Renewable Energy Corporation (REREC)
- Kitukuu Interiors
- Helmwas Limited
- Stanford Limited
- Nairobi Metropolitan Services
- Angelique International Limited
- Shandong Taikai International Limited
- Seafront Company Limited
- Ogola and Murjera Advocates
- Ukweli Party
